## Product Overview

### Full-Featured Meat Processing ERP Meat Processing & Distribution Software

At CAI, we take pride in delivering the most up-to-date, full-featured business management software for 'center-of-plate' meat processors and distributors. We work with some of the largest and most respected names in the industry, providing the tools they need to lower costs, improve efficiency and maximize profits. Here's the some of the latest features:

#### Optimize Your Production, Cutting Stations and Staging Areas

No matter what or how you process, you'll cut costs, increase production yields, maximize cutting station efficiency and achieve total traceability with Provisions.

Convenient tools help you simplify lot tracking through production, accurately account for processed inventory, access raw materials yields (by-product accounting) and calculate exact costs for finished goods. What's more, you can specify product weights to match customer requirements, easily convert total order to pounds and transfer the information to the cutting room floor accurately and efficiently. Capture product shipping and receiving weights quickly and accurately in purchasing, sales and shipping operations. Do it all, more efficiently, with Provisions.

#### Improve Warehouse & Freezer Efficiency

Provisions includes an integrated, real-time warehouse and freezer solution that helps improve efficiency and accuracy in warehousing operations and reduce inventory levels and costs. Provisions uses wireless, hand held RF (radio frequency) mobile PCs and bar code scanners to track inventory from the time raw materials arrive to the shipping of finished goods. The system captures inventory information at the receiving dock and then utilizes this data to help you optimize all facets of your warehousing operations.

The combination of bar code identification, RF data collection technology, and specialized warehousing software lowers inventory levels, reduces receiving, staging, picking and replenishment time and errors, improves order fulfillment and customer satisfaction, and simplifies cycle counting and full physical inventories.

#### Track Inventory from Point of Purchase Through Production

Production efficiency and complete traceability are at the heart of Provisions ERP Software. You can easily track and account for inventory from the point of purchase through the entire production process. This full traceability—and the corresponding 100% accuracy in costing of finished goods—helps you identify the real-time margin of every product, so you can sell more profitably while affording your customers the security of traceability.

## Lot Control from Receiving to Delivery

Provisions automatically tracks lots each time inventory is moved or transferred, and records it electronically as it happens. From a food traceability perspective, lot history is maintained from the time it is received through all production steps and is completed when product is shipped. You always know the age of product and how long it has been in storage.

## Production Packing Stations Improve Accuracy, Yields & Margins

Provisions' Production Packing Interface that meets all of the requirements of a state-of-the-art food processing and production department. The Provisions Production Packing Interface includes production-ready, wash-down workstations, fully integrated electronic scales, and bar code scanners and label printers for more efficient and profitable production processing, accurate production yields and the elimination of manually-entered shipped weights for every order.

## Point-of-Sale (POS) Solutions Integrate Your Retail & Back-Office Operations

Providing fast, first-class customer service can create a positive experience that can turn a first-time shopper into a regular customer that will recommend your business to friends and family. Provisions' integrated POS system makes the checkout process quick and easy, and lets you integrate your retail POS to your back office for improved visibility. You get complete control at the register for cash, checks, and all major credit cards as well as real-time transaction posting, deposit and quote tracking, scheduled deliveries, credit issues and payment processing on account and, most important of all, rapid checkouts—all from one simple menu.

## Access Your Business Software on Your Mobile Device

If you've got your tablet and a Wi-Fi Internet connection, you've got your business too with Provisions. Whether at a client's site, sitting in an airport en-route to a big meeting, or 'vacationing' on a sunny island, Provisions' streamlined mobile order entry application lets your sales reps—or your customers—enter orders, confirm product availability and check order status. By transmitting data securely to the Provisions application server at the office, this remote order entry eliminates the need for double data entry and offers a convenient service to your retail customers.

Provisions also includes an on-demand app for your iPhone or other smart phone that lets you immediately respond to a customer question or request. What better way of demonstrating that you take a genuine interest in their business? Provisions' Mobile Sales Desk iPhone app provides customer contact information, product information, promotions and on-hand inventory counts, month-to-date (MTD) sales and gross profit (GP) as well as each day's total sales and other information—on-demand at the touch of the screen.

Production-ready, wash-down workstations, electronic scales, and bar code scanners and label printers provide more efficient and production processing and more accurate yields.

Capture product shipping and receiving weights quickly and accurately in purchasing, sales and shipping operations. Provisions' integrated inventory control system uses hand-held mobile PCs and bar code scanners to maximize accuracy and control.

Operate your retail points of sale (POS) with a complete cash drawer interface, pole display, receipt printer, barcode scanner, deposit tracking, quotes and deposits, scheduled deliveries, credit issues and payment processing on account—all from one simple menu.
